	Mental Strategies	Concrete	Pictorial	Abstract	Vocabulary	Models, Images and resources
EYFS	<p>The ELG states that children solve problems, including doubling, halving and sharing.</p> <p>Children need to see and hear representations of division as both grouping and sharing.</p> <p>Division can be introduced through halving.</p> <p>Count in twos; fives; tens both aloud and with objects.</p>	<p><u>Grouping Model</u></p> <p><i>Rose has 6 socks. She grouped them into pairs – how many pairs did she make?</i></p> 	<p><u>Grouping Model</u></p> <p>Children to draw the concrete resources they are using.</p> 	<p><u>Grouping Model</u></p> <p>Write the number sentence</p> <p>6 socks make 3 groups of 2</p> <p><u>Sharing Model</u></p> <p>10 sweets shared between 2 equals 5 sweets each</p>	<p>Share</p> <p>Sharing</p> <p>grouping</p> <p>Equal</p> <p>groups</p> <p>Left over</p> <p>Half</p> <p>halving</p>	<p>100 square</p> <p>Number lines</p> <p>Number tracks</p> <p>Bead strings (for children)</p> <p>Bead bar</p> <p>Tens Frame</p> <p>Numicon</p> <p>Place Value Disks</p> <p>Cuisenaire</p> <p>Base tens and ones</p>
		<p><u>Sharing Model</u></p> <p><i>I have 10 sweets. I want to share them with my friend. How many will we have each?</i></p> 	<p><u>Sharing Model</u></p> <p>Children to draw the concrete resources they are using.</p> 	<p>Although not explicit in the Development Matters document, the sharing model is a useful way of introducing young children to simple halves as fractions.</p> <p>Setting the problems in real life context and solving them with concrete apparatus will support children’s understanding.</p> <p>“I have got 5 bones to share between my two dogs. How many bones will they get each?”</p> 		

	Mental Strategies	Concrete	Pictorial	Abstract	Vocabulary	Models, Images and resources
Year 1	<p>Share objects into equal groups and count how many in each group and consider 'left over'.</p> <p>Count on from and back to zero in ones, twos, fives or tens</p> <p>Make connections between arrays, number patterns, and counting in twos, fives and tens.</p>	<p><u>Sharing using a range of objects.</u> Focus on EQUAL groups 6 shared by 2</p>  <p><u>Put small numbers into groups</u> Focus on EQUAL groups Put 8 into groups of 2</p> 	<p><u>Sharing using a range of objects.</u> Focus on EQUAL groups 6 shared by 2</p>  <p><u>Put small numbers into groups</u> Focus on EQUAL groups Put 8 into groups of 2</p> 	<p><u>Sharing using a range of objects.</u> Focus on EQUAL groups 6 shared by 2</p>  <p><u>Put small numbers into groups</u> Focus on EQUAL groups Put 8 into groups of 2</p> 	<p>Share</p> <p>Sharing</p> <p>grouping</p> <p>Equal</p> <p>groups</p> <p>Left over</p> <p>Half</p> <p>halving</p>	<p>100 square</p> <p>Number lines</p> <p>Number tracks</p> <p>Bead strings (for children)</p> <p>Bead bar</p> <p>Tens Frame</p> <p>Numicon</p> <p>Place Value Disks</p> <p>Cuisenaire</p> <p>Base tens and ones</p>
		<p>Practical problem-solving activities involving equal sets or groups. Begin to understand division through grouping and sharing and halving small quantities <i>Can you cut the cake in half? How many pieces are there? How many cakes are there in the box? Take half of them out.</i></p> <p>Solve simple one-step problems using concrete objects, pictorial representations and finding simple fractions of objects, numbers and quantities. with the support of the teacher</p>				

	Mental Strategies	Concrete	Pictorial	Abstract	Vocabulary	Models, Images and resources
Year 2	<p>Practise to become fluent in recall and use of multiplication and division facts for the 2, 5 and 10 multiplication tables,</p> <p>Halve any multiple of 10 up to 100,</p>  <p>Find half of even numbers to 40</p>  <p>Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot</p>	<p><u>Sharing using a range of objects.</u></p> <p>Please see the guidance for Year 1</p> <p>Here is one example</p> <p>30 flowers are shared equally between 5 vases.</p>  <p>Cubes and other manipulatives can be used also</p> <p><u>Grouping using times tables 2 5 10</u></p>  <p>40 divided into groups of 10. $40 \div 10$</p>	<p><u>Sharing using a range of objects.</u></p> <p>Please see the guidance for Year 1</p> <p>Here is one example – hand drawn</p>  <p><u>Grouping using times tables 2 5 10</u></p> <p>Children can draw the groups of 10</p>	<p><u>Sharing using a range of objects.</u></p> <p>Please see the guidance for Year 1</p>  <p>$30 \div 5 = 6$</p> <p><u>Grouping using times tables 2 5 10</u></p> <p>See bar model or part whole model above</p>  <p>$40 \div 10 = 4$</p> 	<p>Divide</p> <p>Share equally,</p> <p>one each, two each...,</p> <p>Grouping</p> <p>equal groups,</p> <p>how many lots of, groups of...</p> <p>half of</p> <p>halved</p> <p>symbol \div</p>	<p>100 square</p> <p>Number lines</p> <p>Number tracks</p> <p>Bead strings (for children)</p> <p>Bead bar</p> <p>Tens Frame</p> <p>Numicon</p> <p>Place Value Disks</p> <p>Cuisenaire</p> <p>Base hundreds tens and ones</p> <p>Arrow Cards</p>
<p>Pupils need to be able to represent problems where the total quantity and group size is known, using multiplication equations with missing factors. For example, “There are 15 biscuits. If I put them into bags of 5, how many bags will I need?” can be represented by</p>						

	<p>Introduce the symbol for division ÷</p>	<p>the following equation:× 5 = 15 Pupils can use skip counting or their emerging 2, 5 and 10 multiplication table fluency to calculate the missing factor.</p> <div data-bbox="443 180 1008 395"></div> <p>Begin to use other x tables and division facts to perform written calculation. Relate to fractions and measures eg. $40 \div 2 = 20$, 20 is a half of 40 Check calculations using the inverse relationship between x and ÷</p>		
--	--	---	--	--

	Mental Strategies	Concrete	Pictorial	Abstract	Vocabulary	Models, Images and resources
Year 3	<p>Halve any multiple of 10 up to 200, e.g. halve 170</p> <p>Recall and use division facts for the 3, 4 and 8 x tables, use halving to derive division by 2, 4 and 8</p> <p>Calculate and write mathematical statements for division using related x tables facts, including for TU ÷ U mentally</p> <p>Develop efficient mental methods using facts e.g. $6 \div 3 = 2$ and $2 \times 3 = 6$ to derive related facts $60 \div 3 = 20$ and $20 \times 3 = 60$</p>	<p><u>Apply division facts for 2, 4, 8, 5, 10 and 3 in both contexts of grouping and sharing</u></p> <p><i>I need 14 ping-pong balls. There are 2 ping-pong balls in a pack. How many packs do I need?</i></p> <p><i>£14 is shared between 2 children. How much money does each child get?</i></p> <p><u>Division with remainders</u> <i>19 cars shared between 5 children</i></p>	<p><u>Apply division facts for 2, 4, 8, 5, 10 and 3 in both contexts of grouping and sharing</u></p> <p><i>I need 14 ping-pong balls. There are 2 ping-pong balls in a pack. How many packs do I need?</i></p> <p><i>£14 is shared between 2 children. How much money does each child get?</i></p> <p><u>Division with remainders</u> <i>19 cars shared between 5 children</i></p>	<p><u>Apply division facts for 2, 4, 8, 5, 10 and 3 in both contexts of grouping and sharing</u></p> <p><i>I need 14 ping-pong balls...</i></p> <p>$14 \div 2 = 7$</p> <p><i>£14 is shared between 2 children. How much money does each child get?</i></p> <p>$14 \div 2 = 7$</p> <p><u>Division with remainders</u> <i>19 cars shared between 5 children</i></p> <p>$19 \div 5 = 3r4$</p>	<p>Divide</p> <p>Share equally,</p> <p>one each, two each...,</p> <p>Grouping</p> <p>equal groups,</p> <p>how many lots of, groups of...</p> <p>half of</p> <p>halved</p> <p>symbol ÷</p> <p>Remainder</p> <p>Left over</p> <p>Repeated</p> <p>subtraction</p> <p>dividend</p> <p>divisor</p>	<p>100 square</p> <p>Number lines</p> <p>Number tracks</p> <p>Bead strings (for children)</p> <p>Bead bar</p> <p>Tens Frame</p> <p>Numicon</p> <p>Place Value Disks</p> <p>Cuisenaire</p> <p>Base hundreds tens and ones</p> <p>Arrow Cards</p> <p>Gattegno chart</p> <p>Place Value Grid</p>

Divide TU and HTU numbers by 10, understand the effect of $\div 10$ e.g. $700 \div 10$,

100s	10s	1s
4	5	0
$\div 10$		$\div 10$
	4	5

Also use the Gattegno Chart to help

Identify remainders when dividing by 2, 5 or 10

Know the vocabulary for division equations see below

dividend		quotient
20	$\div 4 =$	5
	divisor	

Related Calculations

$$14 \div 2 = 7 \quad 140 \div 2 = 70$$

Also use the Gattegno Chart to help

10,000	20,000	30,000	40,000	50,000	60,000	70,000	80,000	90,000
1,000	2,000	3,000	4,000	5,000	6,000	7,000	8,000	9,000
100	200	300	400	500	600	700	800	900
10	20	30	40	50	60	70	80	90
1	2	3	4	5	6	7	8	9

2 digit divided by 1 digit no exchange or remainders

£69 is shared between 3 children. How much money does each child get?

	10s	1s
Child 1	10 10	1 1 1
Child 2	10 10	1 1 1
Child 3	10 10	1 1 1

2 digit divided by 1 digit with no exchange but remainders
£65 is shared between 3 children. How much money does each child get?

Related Calculations

$$4 \times 30 = 120 - \text{draw it}$$

2 2 digit divided by 1 digit no exchange or remainders

£69 is shared between 3 children. How much money does each child get?

2 digit divided by 1 digit with no exchange but remainders
£65 is shared between 3 children. How much money does each child get?

Related Calculations

$$14 \div 2 = 7$$

$$140 \div 2 = 70$$

14
7 7
140
70 70

2 digit divided by 1 digit no exchange or remainders

£69 is shared between 3 ...

$$69 \div 3 = 33$$

Can also count back on number lines (repeated subtraction) or count on. See above.

2 digit divided by 1 digit with no exchange but remainders

£65 is shared between 3...

$$65 \div 3 = 23 \text{ r } 2$$

quotient

a tenth of the size

2 digit divided by 1 digit with exchange but no remainders

*£45 is shared between 3 children.
How much money does each child get?*

2 digit divided by 1 digit with exchange with remainders

Please see above worked examples – exactly the same principle, with a remainder and the need for exchanging tens for ones.

2 digit divided by 1 digit with exchange but no remainders

*£45 is shared between 3 children.
How much money does each child get?*

Can be drawn – please see above example

2 digit divided by 1 digit with exchange with remainders

Please see above worked examples – exactly the same principle, with a remainder and the need for exchanging tens for ones.

2 digit divided by 1 digit with exchange but no remainders

£45 is shared between 3...

$$45 \div 3 = 15$$

2 digit divided by 1 digit with exchange with remainders

Please see above worked examples – exactly the same principle, with a remainder and the need for exchanging tens for ones.

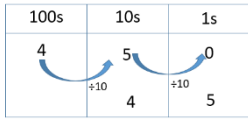

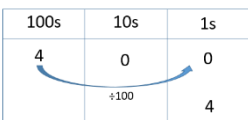

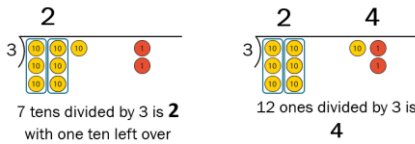

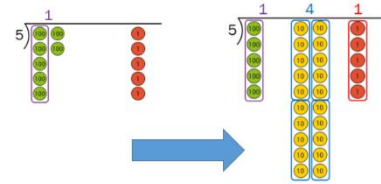

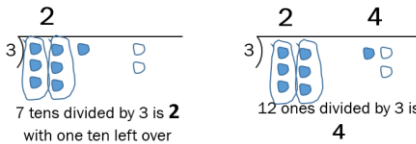

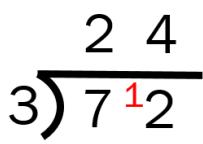

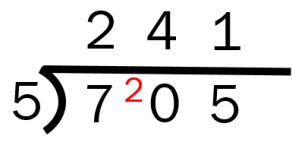

Solve problems in context deciding which method to use and why, including

missing number problems

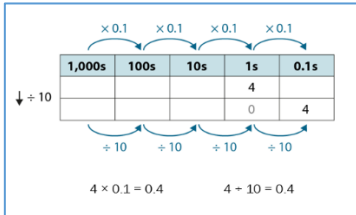

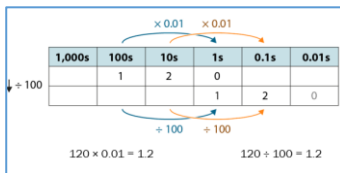

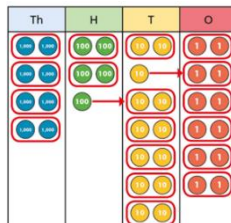

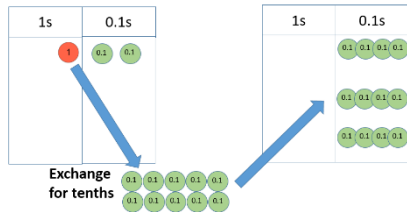

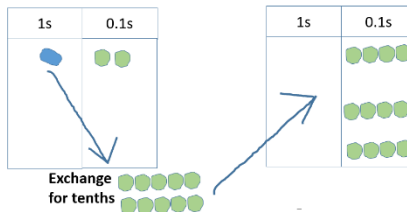

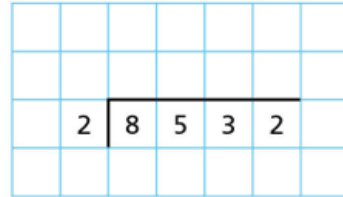

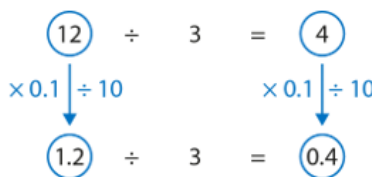

measuring and money context

correspondence problems in which m objects are connected to n objects eg 12 sweets shared equally between 4 children; 40 cakes shared equally between 8.

		Use practical methods and jottings, including remainders

Know the vocabulary for division equations see below

$$\begin{array}{c} \text{dividend} \downarrow \\ 20 \div 4 = 5 \\ \uparrow \\ \text{divisor} \end{array}$$

$$\begin{array}{r} 5 \leftarrow \text{quotient} \\ 4 \overline{)20} \\ \text{divisor} \quad \text{dividend} \end{array}$$

$$\begin{array}{r} \text{dividend} \rightarrow 20 \\ \text{divisor} \rightarrow 4 \end{array} = 5 \quad \begin{array}{c} \uparrow \\ \text{quotient} \end{array}$$

Dividing with a two-digit number using partitioning

Children should be confident enough to work in the abstract with this. If needed, place value counters can still be used.

Counters can also be used to create the multiplication table to support the division.

Dividing with a two-digit number using short division

Children should be confident enough to work in the abstract with this. If needed, place value counters can still be used.

Counters can also be used to create the multiplication table to support the division.

Dividing with a two-digit number using partitioning

When undertaking a division using two-digit numbers. Create a multiple chart first – start with 10 and 5, then 2, 4, 8. If other multiples are required, calculate when needed.

	31	mental method
x1	31	x1
x2	62	double 31
x3	93	add 31 to 62
x4	124	double 62
x5	155	half of 310
x6	186	double 93
x7	217	186 + 31
x8	248	double 124
x9	279	248 + 31
x10	310	easy to calculate

Dividing with a two-digit number using short division

When undertaking a division using two-digit numbers. Create a multiple chart first – start with 10 and 5, then 2, 4, 8. If other multiples are required, calculate when needed.

	31	mental method
x1	31	x1
x2	62	double 31
x3	93	add 31 to 62
x4	124	double 62
x5	155	half of 310
x6	186	double 93
x7	217	186 + 31
x8	248	double 124
x9	279	248 + 31
x10	310	easy to calculate

Dividing with a two-digit number using partitioning

See adjacent column to support this

$$310 \div 31 = 10$$

$$124 \div 31 = 4$$

$$434 \div 31 = 14$$

Dividing with a two-digit number using short division

See adjacent column to support this

$$\begin{array}{r} 0 \ 1 \ 4 \\ 31 \overline{)4 \ 4 \ 3 \ 1 \ 2 \ 4} \end{array}$$

divisor

quotient

a tenth of the size

Dividing with a two-digit number using long division

Children should be confident enough to work in the abstract with this. If needed, place value counters can still be used.

Counters can also be used to create the multiplication table to support the division.

Related Calculations

Division involving decimals
 $1.2 \div 3$

Dividing with a two-digit number using long division

When undertaking a division using two-digit numbers. Create a multiple chart first – start with 10 and 5, then 2, 4, 8. If other multiples are required, calculate when needed.

	31	mental method
x1	31	x1
x2	62	double 31
x3	93	add 31 to 62
x4	124	double 62
x5	155	half of 310

x9	279	248 + 31
x10	310	easy to calculate

Related Calculations

Division involving decimals
 $1.2 \div 3$

Dividing with a two-digit number using long division

See adjacent column to support this

$$\begin{array}{r}
 014 \\
 31 \overline{) 434} \\
 \underline{-31} \\
 124 \\
 \underline{-124} \\
 0
 \end{array}$$

Related Calculations

Division involving decimals
 $1.2 \div 3$

$$\begin{array}{ccc}
 12 \div 3 = 4 \\
 \downarrow \times 0.1 \div 10 \\
 1.2 \div 3 = 0.4
 \end{array}$$

Divide numbers up to four-digits by a two-digit whole number using efficient written method of long division, and interpret remainders as whole numbers, fractions, decimals fractions or by rounding as appropriate for the context

Other worked examples
of formal written division methods
– with a remainder

$$354 \div 15 = ?$$

$\begin{array}{r} 23 \text{ r } 9 \\ 15 \overline{) 354} \\ \underline{30} \\ 54 \\ \underline{45} \\ 9 \end{array}$	$\begin{array}{r} 23 \frac{9}{15} \\ 15 \overline{) 354} \\ \underline{30} \\ 54 \\ \underline{45} \\ 9 \end{array}$	$\begin{array}{r} 23.6 \\ 15 \overline{) 354.0} \\ \underline{30} \\ 54 \\ \underline{45} \\ 90 \\ \underline{90} \\ 0 \end{array}$
So, $354 \div 15 = 23 \text{ r } 9$	So, $354 \div 15 = 23 \frac{3}{5}$	So, $354 \div 15 = 23.6$
